Standards & Usages for Visual Elements

Version 1.1

Last revised 2012-09-24

Table of Contents

I	Full Lockup	P1
II	Primary Mark	P3
III	Logotype	P5
IV	Colour	P7
V	Typography	P8

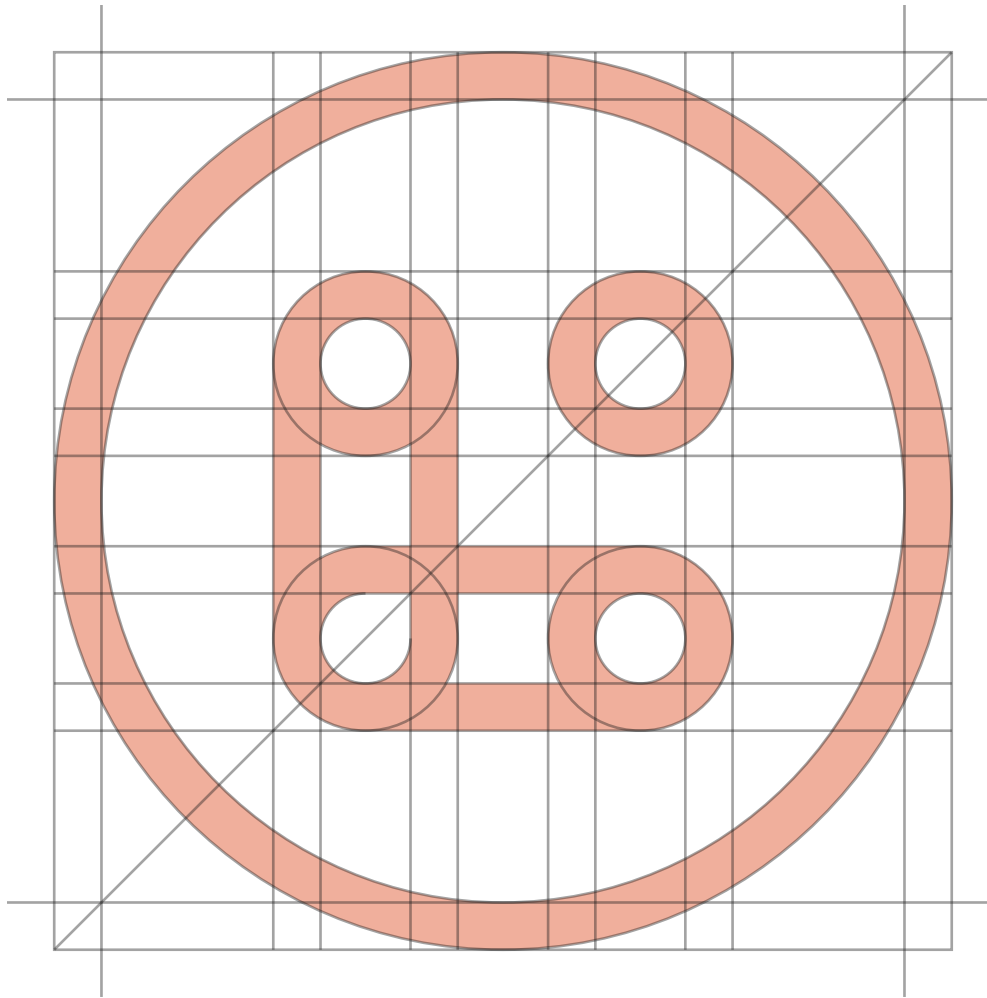

a = Difference between height of primary mark versus height of logotype.

b = Overall padding: minimum space allowed between lockup and any other element(s). Two times width or height of a .

c = Horizontal spacing between primary mark and logotype. Three times width of a .

The primary mark is composed of four circles arranged in a grid-based square, three of which are connected as a play on the connect-the-dots idiom. The three connected

circles form an "L" while the remaining circle appears as a single dot – hence *Learndot*. The components are contained within a larger circle to unify the mark.

Learndot

The wordmark is a customized version of the font Aperçu bold by Colophon Foundry. The ball terminal in the “r” is stenciled out from the rest of the

letterform as an extension of the dot metaphor. Because of this visual cue, the wordmark can stand on its own or harmoniously alongside the symbol.

Visual Language

It is important that each element of the brand's identity feels cohesive and consistent. Extensions of the brand – such as icons and illustrations – that make up its visual language must be designed in a specific way.

Geometric forms play a key role in the visual language and an essential element is the circle. As the main visual cue found in the the primary mark and logotype, the circle should also be integrated into the visual

language whenever possible. Mirroring the primary mark, thick stroke lines with rounded edges should be used to outline shapes. Overall, each visual or graphic should feel clean, bright and unified.
